EXPERIENCE

CANSOMCOM — UX Designer & Developer

Winter 2019 | Oakville, ON

Research, design and implement an interface within Windows that allows for object based detection from real time video footage, using an existing open source object recognition algorithm such as YoloV3 and TensorFlow.

Sheridan College — PAL (Peer Assisted Learning) Leader

Winter 2019 | Oakville, ON

Organize and oversee weekly group study sessions for peers and students in need of supplemental learning in programming classes.

Attend and troubleshoot student questions concerning the composition and implementation of scripting language in C# in conjunction with Unity game engine.

York Regional Police — Interaction Developer

Summer 2018 | Stouffville, ON

Responsible for designing major gameplay systems such as player to game & player to player interaction, game score and scene transitions

Construct and assemble scripts in C# and Unity with direction from senior designer allowing the implementation of major game systems, in particular scene transition, inter-gameplay communication and main debug functions

PENTAX Canada — Bilingual Marketing Coordinator

Fall 2016 | Mississauga, ON

Facilitate the communication between customer and sales/technical personnel to create service and purchase contracts for existing and new products

Assist in the creation of presentation material and information pertaining to company products to potential leads and customers as per direction of sales and marketing teams
